-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1 and 16 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 16 are rejected under 35 U.S.C. 102(n) as being anticipated by Huemann et al, US Patent 5,661,811. Huemann et al teach a rear seat audio controller comprising a plurality of audio visual devices 10, 12, 14, a front seat speaker 20, a rear seat speaker 36, a headphone 38, an operating device 30 for performing a predetermined operation by the driver (bass, treble, fade, balance, volume control), a control device 32, and a first signal attenuator 16. The audio processor 16 works under the control of the front control therefore it can attenuate the headphone signal using fade control. The rear control unit 34 can independently output a reproduced audio sound from one of the plurality of audio visual devices. Claims 1 and 16 are rejected.

Claims 1 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Oxman, US Patent 4,352,200. Oxman discloses a wireless aircraft passenger audio entertainment system comprising a plurality of audio visual devices (audio channels for selection by the passengers), inherent front seat and rear seat speakers, headphone 43, microphone 142 as an operating device for performing a predetermined operation by the driver (pilot), override audio circuit 141 for a

control device and transistors 110 and 11 as a first signal attenuator. See column 14 lines 16-55.

Claims 1 and 16 are rejected.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
